# PREFACE

## TO THE REVISED EDITION.

AMONG the smaller dictionaries of the English and German languages the German Dictionary compiled by Miss E. Weir has for many years been held in well-deserved esteem by English and American students of German, and even been used by several of the latest German dictionary writers. When the publishers asked me to revise the book, originally published in 1888, I undertook the laborious task in the hope of being able to correct a number of actual mistakes, and to add many important words and phrases that had either been overlooked or had recently come into existence. But, especially, I wished to make several general improvements which would materially enhance its practical usefulness, and make it, if possible, the best English-German dictionary in one volume at a moderate price, a book comparable, in its more limited sphere, to the new Grieb-Schröer, Flügel-Schmidt-Tanger, and the small Muret. To the accomplishment of this task nearly all my leisure hours during the last eight years have been devoted, but I am only too conscious that I have not been able fully to realize the aim which I had set before me. I shall at all times be sincerely grateful for notifications of mistakes or important omissions — the only way in which those who use a book of this kind can to some extent repay the compiler for the onerous work he has performed in their interest.

Only the principal accent of the German words has been given, and this, it is hoped, will be found helpful. As the book will in all probability be mainly used by English-speaking students — although not addressed to them exclusively — it did not seem to be equally important to indicate the accentuation of the English words. For the same reason the vocabulary of the German-English part is somewhat fuller than that of the English-German portion. In the former, besides the stock of ordinary words that are bound to appear in both parts, many German dialectal terms (e. g. *Deern, man, Marjell, Fluh*, etc.) are introduced, as well as the most common German slang expressions — such as occur in every modern German book or newspaper, and are frequently heard in educated families — while there was no necessity to give them in the English-German part. All reasonable assistance for writing German composition, up to an advanced stage, has, however, been given, and it will be found that the idioms of both languages have been treated with particular fullness for a book of this size.

In compiling this new edition the best modern dictionaries of English and German have been consulted, above all the admirable Muret-Sanders, in the compilation of which I myself had for some time a modest share. The nature

Burne, and of Messrs. H. Brown, E. C. Quiggin, Thomas Rea, and F. E. Sandbach. I am particularly indebted to my friends and former pupils Mr. E. Bullough, and, above all, to Miss Minna Steele Smith, Head Lecturer in Modern Languages at Newnham College, who have with the greatest care assisted me in the revision of part of the proofs. Much that is good in the book is due to the assistance received from these various kind helpers, while I must alone be responsible for its shortcomings. My thanks are also due to the great pains bestowed on its production by the printers of Cambridge, U. S. A., and the care and resourcefulness of their able press reader. I now dismiss my book from the quiet study into the bustling world and its manifold claims on it with the parting words of the good old Sir Richard Ros :

“ Goo, litle book, God sende the good passage . . .  
 And specially lete this be thi prayere  
 Vnto hem all that the wil rede or here,  
 Wher thou art wrong, after ther helpe to calle,  
 The to correcte in eny parte or alle.”

---

A large number of minor corrections and improvements have been made in this reprint, and all the misprints noticed have been corrected. I shall be grateful to any users of this book who will kindly either point out to me actual mistakes, or call my attention to important omissions (for a book of this size) in order to enable me to introduce further improvements into subsequent editions. My thanks are due to Professor Walter Rippmann, M. A., Mr. Francis E. Sandbach, M. A., Ph. D., Mr. E. C. Quiggin, M. A., Ph. D., Mr. Thomas Rea, M. A., Mr. G. Morier-Hinde, M. A., Mr. A. Henry, M. A., Mr. E. Barry, M. A., and Mr. G. W. Bullen, for kindly sending me corrections and suggestions.

## EXPLANATION OF METHOD.

**Grouping of words into articles.** WORDS etymologically related and having an initial syllable or syllables in common are grouped under this initial syllable or syllables. The completion of each word (the suffixes and second components), being printed in full-faced type, readily catches the eye, thus obviating any difficulty which the breaking up of the words might otherwise present. Words formed by terminations (derivative words) come first in each group in alphabetical order, the compounds following in the same order, but separated from them by the abbreviation *Comp.* (for Compound).<sup>1</sup> No attempt has been made to distinguish between *primary* derivatives (such as *Aunst*, *Stumc*, *Stimmet*) and *secondary* (as *trinfbar*, *Spicler*, *licblich*), such distinctions being deemed beyond the province of a work like the present.

**Use of Brackets.** When a prefix, suffix, or component of a word is enclosed in brackets it is to be understood as signifying that the unbracketed word is a synonym by itself, and when taken with the bracketed word or syllable forms another synonym, which may be used in the same sense as that in which the unbracketed word is used. Thus (*Stut*)-*Ader* signifies that *Ader* and *Stutader* are both equivalents in a certain sense of the English word 'vein'; in the same way, (*cin*)-*tauchen*, to dip; (*cr*)-*fählich*, venial; electric(al), *ctctriich*; crook(ed)-backed, *buctig*, etc., etc. But if a word or phrase enclosed in brackets in one language be followed by a word or phrase enclosed in brackets in the other language, the contents of the one bracket are to be understood as translating the contents of the other: for example — to do good (evil), *Gutes* (*Böses*) *thun* — where *Böses* is the translation of the bracketed 'evil,' and the phrase *Böses thun* of the phrase 'to do evil.' When a German word or words enclosed in brackets is followed by no bracketed word or words in English, the contents of the bracket are for the purpose of showing the case required by the German verb it accompanies, or for some other grammatical purpose; thus, when 'to court' is to be rendered by (*ciner* *Person*) *ben. Hof machen*, (*ciner* *Person*) is inserted for the purpose of informing the student that, although the English verb governs the accusative case, the German requires the dative; in the same way, 'to court' is further defined as *sich* (*nm ciner* *S.*) *bewerben*, in order to exhibit the fact that in this sense of 'court' the German equivalent is followed by the accusative with *nm*. In the German-English division (*cinem* *ctwas*) is employed as a short way of saying that the verb to which it is joined governs the dative of the person and the accusative of the thing.

**Punctuation.** When several synonyms are given, all answering to one sense of a word, they are separated by commas, whilst those representing different senses are separated by semicolons; thus — *fall*, decay, ruin, downfall; case (*Gram.*) — 'decay,' 'ruin,' 'downfall,' being all synonyms of *fall* in one sense, are only separated from one another by commas, but they are separated from 'case,' which represents a wholly different sense, by a semicolon. A phrase, on the other hand, even when exhibited in wholly different senses, has the different renderings divided only by commas; before each new sense, however, in the English-German part, an explanatory word or phrase is inserted in parentheses — as — to break down, *im Abnehmen sein* (as a *p.'s* health), *durchfallen* (at an examination), *umwerfen* (as a carriage) — or — to come round (recover), *sich erholen*, (change one's opinion) *sich wanken*, *sich bedenken*, *sich anders bestimmen*, (return, as an anniversary) *wiederkehren*, (return, as a term) *fällig werden*, (change, as the wind) *sich drehen*, etc.

<sup>1</sup> English words given under *Comp.* are not always written as compounds.

**English Synonyms or Explanations of German words.** In Part II., or the English-German division of the work, every new sense in which a word is taken is either preceded by an English synonym<sup>1</sup> in Roman type in parentheses, as — to doom (sentence) *verurtheilen*; (destine) *bestimmen* — or followed by some explanatory word or phrase in italics in parentheses, as — to do, *erweifen* (*kindness*) — or — to drive, *geiferu* (*as infants*) —. In place of a synonym, a word is occasionally preceded by an explanatory clause in italics, as — to drink (*of beasts*) *saufen* — which denotes that 'drink,' when expressing the action of a beast, is translated by *saufen* and not by *trinken*, which is the word employed in the case of human beings.<sup>2</sup>

**Gender of German Nouns shown by accompanying Article or Adjective.** The gender of German substantives in this part, too, is shown by the accompanying article *der, die, das*; but when an adjective is given with the substantive the article is usually omitted and the gender shown by the termination of the adjective, as — dry measure, *trockene Maß*; dry cough, *trockener Husten*.

**The term 'Participle.'** The term *part.* (for participle) has been employed throughout to denote a class of words, so numerous in the German language, which, while possessing a certain force, have no precise syntactical relation to the other words in a sentence. This is the only particular in which the ordinary terminology of English grammarians has been departed from.

**Similarly spelt words are numbered.** Words differing in meaning and origin, but spelt alike, are numbered, so that no difficulty can arise owing to their separation for etymological reasons under different heads

For an explanation of abbreviations, see Abbreviations (p. xiv.).

<sup>1</sup> These words are, of course, only approximately synonymous.

<sup>2</sup> It is, of course, to be understood that where a synonym of, say, an adjective is explained, the substantive, etc., corresponding to this adjective, and included in the same article, is not in general separately explained: as — *Pleasant, adj.*, *freundlich* (*as a room*); (lively) *munter*, etc. — *ness, s.*, *die Freundlichkeit; die Munterkeit*.
